Popular Outdoor

ANTIRRHINUM - SNAPDRAGON

Outdoor Snapdragons have been growing more popular in the home garden as the difficulties experienced years ago from rust have been substantially controlled by Rust Resistant Strains. For that reason the group listed here is to be highly recommended to both the bedding plant grower as well as the commercial grower of outdoor cut flowers. We have selected these strains of the varieties listed with much care from the cultures of outstanding growing specialists. They will give you the best stock available.
